Hi, I am an enthusiastic and self-motivated Data Analyst with excellent knowledge and experience working Data Preprocessing,Modeling ,Analytics and Visualization. I have already completed my MSc in Mathematics . As a Mathematician, I have a strong Mathematics background and use Predictive modeling and Data mining algorithms to solve challenging Business problems. Involved in the Python open source community and passionate about deep reinforcement learning.

Data science is my passion & I really enjoy working with Data. So I think I can assist my best for your company as a Data Analyst or Data Scientist .

EXPERIENCE

V2 Technology Ltd. — *Data Analyst*

19 Oct 2021 - PRESENT

Grameen Solutions Ltd.— *Web Developer*

1st Dec 2019 - 30th Oct 2021

Roopokar Creative Studio. — Junior *Web Developer*

28 Sep 2019 - 30th Nov 2019

EDUCATION

National University, Bangladesh — *MSc in Mathematics*

Oct 2017 - Dec 2019verify

Completed masters with CGPA 3.27 .

National University, Bangladesh — *BSc in Mathematics*

Feb 2013 - Nov 2016

I have finished BSc with 3.21 CGPA with honors .

SKILLS

Bigquery,SQL(MySQL, PostgreSQL,..)

MsExcel,PowerBi,Tableau

Google Data Studio,Looker BI

Python,Apps Script

NumPy,Pandas,MatPlotlib,Seaborn,ScikitLearn

Statistics,Linear Algebra,Calculus,Discrete Mathematics,Numerical Analysis

CERTIFICATION

#Big Data - Show credential

#Python for Everybody - Show credential

#Google BigQuery & PostgreSQL : Big Query for Data Analysis Show credential

#Applied Data Science with Python Show credential

#SQL for Data Science Show credential

#Deep Learning Show credential

PROJECTS

Professional Project (Big Data) >> Biggest Tobacco Company in Bangladesh .

Consolidation - Revalidation > Special Retailer Defined for their sales and other performance .

- **Work scope >** Day by Day Sales Memo Data *Analysis Breakdown on Region, Area,Territory,distribution point Also Each Retailer *Sales Value & Volume Depends on Budget price * Based on Sales and other performance special retailer consolidated and Revalited * Fine top seller on general Trader and drop worst perform consolidated Retailer that's Revalited * analysis sales prediction and top selling with top consumers area .
- **Using stack >** * Load data AWS -RDS to Google Storage * Build automated python script,using Virtual Machine and Automated Load Data Google Storage to Bigquery *Data Preprocessing (on Bigquery) , Excel * Analytical Dashboard and visualization (Google Data Studio,Tableau,Looker Bi)

Project Cavalry - Whole Bangladesh Survey Data

- **Work scope >** Target Vs Achievement * Achievement Analysis * consumer Footfall * Automated Audio Remarks * Analysis Audio Data * Verify 2 step survivor working progress .
-
- **Using stack >** *Data Preprocessing (on Bigquery) * Analytical Dashboard (Google Data Studio)

Project Ls Reinforcement - Survey Data Based on Sales and Marketing Performance

- **Work scope >** Call verification Analysis *Worst & Top performing employee conditionally Analysis * Consumer Behavior * Analysis Audio Data * Mismatch 2 step survivor working progress score .
- **Using stack >** *Data Preprocessing (on Bigquery) & Excel Power Query * Analytical Dashboard (Power Bi & Google Data Studio)

#Running Project >> - Project Alchemy ,2 Year Consumers Data Analysis for Launching New Product.
