PROFILE

Results-driven Data & Analytics Engineer with **5**+ years of experience delivering business intelligence solutions, Data Analysis,Database Engineering and process improvement. Skilled in **SQL**, **Excel**, **Python**, **BigQuery**, and cloud platforms (**GCP**, **Snowflake**, AWS), with proven expertise in relational database design, data normalization, and BI tools (Power BI, Tableau, Looker). Adept at building interactive dashboards, optimizing **ETL** workflows, and collaborating with cross-functional teams to identify inefficiencies and deliver data-informed solutions.

EXPERIENCE

V2 Technologies Ltd *Dhaka,Bangladesh*

Senior Data Analyst May 2024 – Present

|

Data Analyst Oct 2021 – Apr 2024

- Led the Market Visit Analysis project for **Grameenphone**, Designed and developed data architecture and real-time reporting tools, market operations, empowering business teams with automated insights that improved strategic decisions and operational efficiency.
- Built and optimized SQL queries and relational database schemas for operational analytics, applying normalization and indexing to improve query performance.
- Analyzed complex datasets using SQL and BigQuery to enhance BAT's(**British American Tobacco** Bangladesh) **e-CRM** performance, delivering clear visual reports that strengthened stakeholder engagement and customer targeting.
- Built interactive dashboards in Power BI and Tableau for KPI tracking, sales analysis, and performance monitoring, supporting leadership with timely, actionable insights.
- Developed scalable ETL pipelines using cloud platforms (GCP, AWS), ensuring accurate, reliable data flows for business reporting and trend analysis.

AiQuest Intelligence *Dhaka,Bangladesh*

Data Analyst Instructor (Part Time) Nov 2021–Dec 2023

- Delivered hands-on training in data analysis, Excel, SQL, and BI tools, emphasizing real-world problem-solving and business impact.
- Taught core concepts in data modeling, data warehousing, and predictive analytics aligned with industry practices.
- Instructed learners in advanced SQL & Python for data extraction, transformation, and reporting, preparing them for data-driven roles.
- Guided students in developing interactive dashboards using Power BI and Tableau for dynamic business reporting.

Trioco Ltd. *Dhaka,Bangladesh*

Junior Software Developer (Database) Dec 2019 –Oct 2021

- Specially Focused on MySQL Database Management & ETL Process.
- Developed web applications using HTML, CSS, JavaScript, React.js, Python, and MySQL.
- Collaborated on cross-functional teams to ensure seamless website navigation and design.

SKILLS

Business Intelligence Tools : PowerBI, Looker

Programming Languages : SQL(Advanced: joins, CTEs, window functions), Python, Javascript

Analytics & Reporting : Trend analysis, dashboard development, performance monitoring, KPI tracking

Cloud & Data Platforms : Google Cloud Platform (BigQuery, Dataflow), Snowflake, AWS (Redshift, S3, EC2)

API Development: Flask, FastAPI

Database & Warehouse Design: Relational database design, normalization, indexing, key constraints ,Warehouse design

ETL & Data Engineering : Scalable ETL/ELT pipelines, data modeling, workflow automation, data integration,Docker
Statistical Analysis : Excel (Power Query, VBA,DAX), Python (pandas, statsmodels), foundational SPSS/SAS
Version Control : Git, GitHub
Collaboration & Communication : Cross-functional teamwork, stakeholder engagement, clear technical communication
Soft Skills : Problem solving, continuous improvement mindset, adaptability, attention to detail

EDUCATION

IBA - University of Dhaka *Dhaka,Bangladesh*

- **Advanced Certificate for Management Professionals(ACMP)** 2025

National University *Dhaka,Bangladesh*

- **MSc in Mathematics** 2017 – 2019
- **BSc in Mathematics** 2013 – 2016

PROJECTS

Market Visit Analysis & POSM Stock Management (Current Project for Grameenphone)

- Designed and managed scalable ETL pipelines and data architecture using BigQuery, SQL, and Python.
- Developed real-time analytics dashboards to monitor market visitor activity and POSM inventory.
- Automated reporting processes with Python and Excel, improving data accuracy and operational efficiency.

E-CRM System Analysis (BATb)

- Led data pipeline design and optimization to improve CRM data integration and business operations.
- Collaborated with stakeholders to develop tailored dashboards for comprehensive customer insights.
- Managed cross-functional teams ensuring smooth implementation of analytics solutions.
- Enhanced decision-making by delivering clear, data-driven reports.

IRIS - KPI Management & Retail Performance Analysis (BATb)

- Analyzed sales, customer behavior, and inventory data to identify key performance trends.
- Developed BI dashboards using Power BI/Tableau to track KPIs and retail performance metrics.
- Recommended pricing and marketing adjustments based on data-driven insights.

Sentinel - Online E-Cigarette Sales Management System (BATb)

- Conducted detailed sales data analysis to identify trends and revenue opportunities.
- Created interactive dashboards for performance monitoring and strategic planning.
- Provided actionable recommendations to improve sales and customer engagement.

Textile Industry Data Analysis

- Analyzed production, sales, and financial datasets for multiple textile companies.
- Developed visual reports and dashboards for operational monitoring.

CERTIFICATIONS

- Certified Data Analyst Associate – DataCamp – Jun'25 *(link)*
- Certified Data Engineer Associate – DataCamp – Jun'25 *(link)*

PUBLICATIONS

Deep Learning-Based Real-Time Bengali Multi-Vehicle Number Plate Detection. *(link)*

- Achieved 97.8% accuracy in real-time detection of Bengali vehicle license plates using YOLOv8.
- Curated a custom dataset with 1080+ annotated images; applied OCR for high-accuracy plate recognition.
- Integrated OCR for character recognition and deployed the system in a real-time video processing pipeline.
