Dhaka, Bangladesh | Open to remote work and relocation

PROFILE

I have 7+ years of experience across data analytics, business intelligence and data engineering, and for the last three of them I've led the Data & Analytics team of seven at V2 Technologies. I work on the full path from raw data to decisions: designing databases and data warehouses, building ETL pipelines with dbt and Airflow on BigQuery and PostgreSQL, analyzing and modeling the data, from forecasting and marketing mix models to machine learning, and delivering Power BI, Tableau and Excel reporting that management actually uses. I currently lead data and analytics for EveryAI, an AI subscription app with 500K+ users, and the rebuild of BAT Bangladesh's 8-year-old e-CRM platform. Other clients include Grameenphone, Unilever Bangladesh, City Bank and Nagad.

PROFESSIONAL EXPERIENCE

V2 Technologies Ltd — *Dhaka, Bangladesh*
Senior Data Analyst & Team Lead, Data & Analytics — May 2024 – Present
Data Analyst — Oct 2021 – Apr 2024

- **Team leadership:** lead the Data & Analytics team of seven; plan, assign and track work across client projects, review SQL, models and dashboards, mentor junior analysts and engineers, and report progress to management.
- **Data engineering:** build ETL/ELT pipelines with dbt, Apache Airflow, n8n and Python from REST APIs (JSON), flat files and application databases, including CDC-based replication, CI/CD deployments and onboarding ETL for new clients.
- **Data warehousing and modeling:** design star-schema data marts and warehouse layers in dbt on BigQuery and PostgreSQL, with data treatment and aggregation rules agreed with business teams.
- **Databases and cloud:** design and tune production PostgreSQL (schema design, indexing, stored procedures and functions, query optimization, migrations); control BigQuery cost and usage, and manage credentials with GCP Secret Manager.
- **Data quality and governance:** validation and reconciliation against source systems, monitoring with alerts, an issue log to resolution, data dictionaries and metric definitions, and security and privacy rules for client data.
- **BI and reporting:** define KPIs with business teams and deliver Power BI, Tableau and Excel dashboards and daily, weekly and monthly reports for sales, finance, HR and operations; train users and support them.
- **Analytics and statistics:** segmentation, cohort and retention analysis, significance testing, regression and time-series forecasting; marketing mix modeling, sales effects and ROI, response curves and budget scenarios.
- **Machine learning and AI:** predictive models in scikit-learn trained and deployed on AWS SageMaker, anomaly detection, entity matching and network analysis, Streamlit data apps; daily use of Claude and Google Antigravity, and MCP servers and AI skills that automate routine work.
- **Automation:** scheduled Python jobs for reports, auto-emails and notification systems that replace manual reporting.
- **Stakeholders and business analysis:** gather requirements through stakeholder interviews (BRDs), write technical specifications and data flow diagrams, run market, competitor and financial analysis, manage cross-functional projects, and present results to leadership, including international clients.

EveryAI – AI subscription app | everyai.app | *Data & Analytics Lead* | *Current*

- Lead data and analytics for a multi-model AI subscription app with 500K+ users who subscribe through telco partners Robi and Cirkle; own the data work from pipelines to reporting.
- Customer segmentation, cohort and retention analysis, and customer and revenue forecasting to support planning.
- Revenue and finance automation: pack-wise revenue reporting (DOB and operator bundle packs) automated end to end with SQL and scheduled Python, including auto-generated charts and emailed reports.

e-CRM Platform – British American Tobacco Bangladesh | *Analyst to Project Lead* | *5 years*

- Leading the rebuild of the 8-year-old platform: redesigning the database and data model for lower running cost and automation-friendly pipelines, and keeping data integrity through the change with stakeholders, backend and app teams.
- Spent the first years as the platform's analyst: SQL and BigQuery analysis of sales and customer data, with Power BI and Tableau dashboards for KPI tracking and customer targeting.

e-CRM – Grameenphone | *Ongoing*

- Designed the data architecture, BigQuery ETL and real-time reporting on field market visits and POSM inventory.
- Built Python anomaly detection that flags suspicious field visits into audit tables, delivered as a month-to-date Excel report.

Gamified recruitment platform (SaaS)

- Built the data architecture and assessment analytics end to end for our hiring product, onboarded clients such as City Bank and Nagad, and now guide junior analysts on it.

Univision – Unilever Bangladesh | *Project Lead* | *2 years*

- Led the data and analytics work, coordinating with the client and internal teams.

Earlier projects | *2021 – 2023*

- IRIS and Sentinel (BAT Bangladesh): retail KPI, customer behaviour, inventory and online sales analysis with pricing and marketing recommendations.
- Textile industry: production, sales and financial analysis for several textile companies, including manufacturing KPIs, with operational dashboards.

AiQuest Intelligence — *Dhaka, Bangladesh*
Data Analyst Instructor (Part-time) — Nov 2021 – Dec 2023

- Taught Excel, SQL, Python, data modeling, data warehousing, predictive analytics and Power BI/Tableau in hands-on courses.

Trioco Ltd. — *Dhaka, Bangladesh*
Junior Software Developer (Database) — Dec 2019 – Oct 2021

- Managed MySQL databases and ETL processes, and built web applications with JavaScript, React.js and Python.

TECHNICAL SKILLS

Data Engineering: dbt, Apache Airflow, n8n, Python (pandas), ETL/ELT, CDC, REST APIs, JSON, CI/CD, Docker, Git/GitHub, Flask, FastAPI

Warehousing & Databases: BigQuery, PostgreSQL, MySQL, Snowflake, Redshift; star schema, data marts, stored procedures, indexing, query optimization, migration

BI & Reporting: Power BI (DAX, Power Query), Tableau, Looker, Excel (PivotTables, XLOOKUP, conditional formatting, VBA), PowerPoint

Analytics & Statistics: Segmentation, cohort analysis, significance testing, regression, time-series forecasting, marketing mix modeling, ROI analysis

ML & AI: scikit-learn, statsmodels, AWS SageMaker, anomaly detection, entity matching, NetworkX, Streamlit; Claude, Google Antigravity, MCP servers

Cloud: GCP (BigQuery, Dataflow, Secret Manager), AWS (S3, EC2, SageMaker), Microsoft Azure

Business & Leadership: ACMP (IBA, University of Dhaka), team leadership, stakeholder management, BRDs, market and financial analysis, project management, leadership presentations

EDUCATION

Advanced Certificate for Management Professionals (ACMP) — 2025
Institute of Business Administration (IBA), University of Dhaka

MSc in Mathematics — 2017 – 2019
BSc in Mathematics — 2013 – 2016
National University, Bangladesh
